EYES WIDE OPEN

What if the browser was designed for the enterprise?

Michael Fey

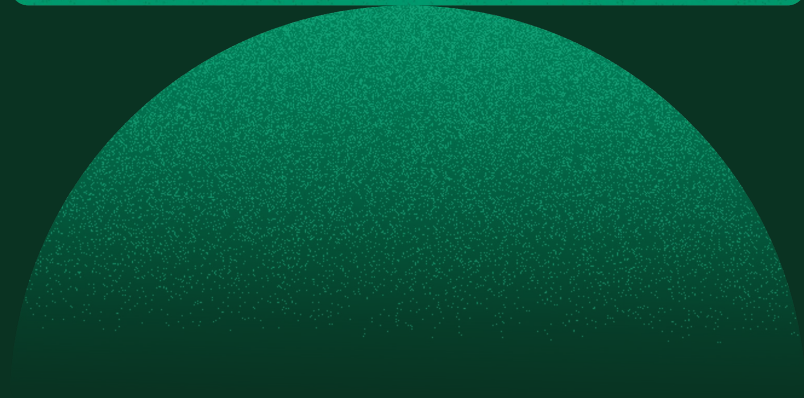

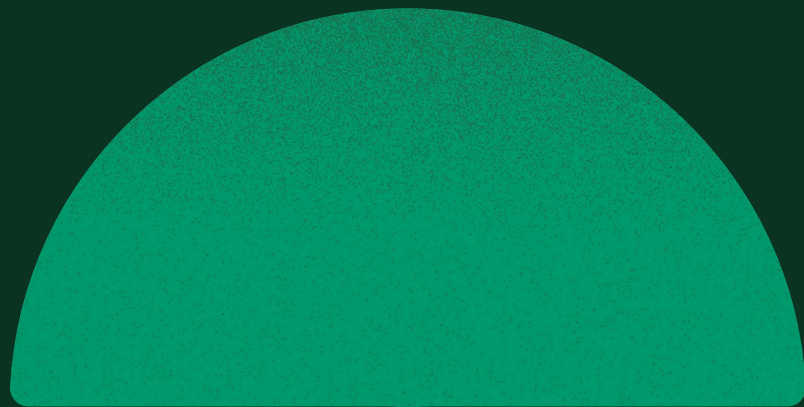

Co-Founder, CEO, Island.io

Defining the Category of the Enterprise Browser

Mike Fey

Chief Executive Officer
Island

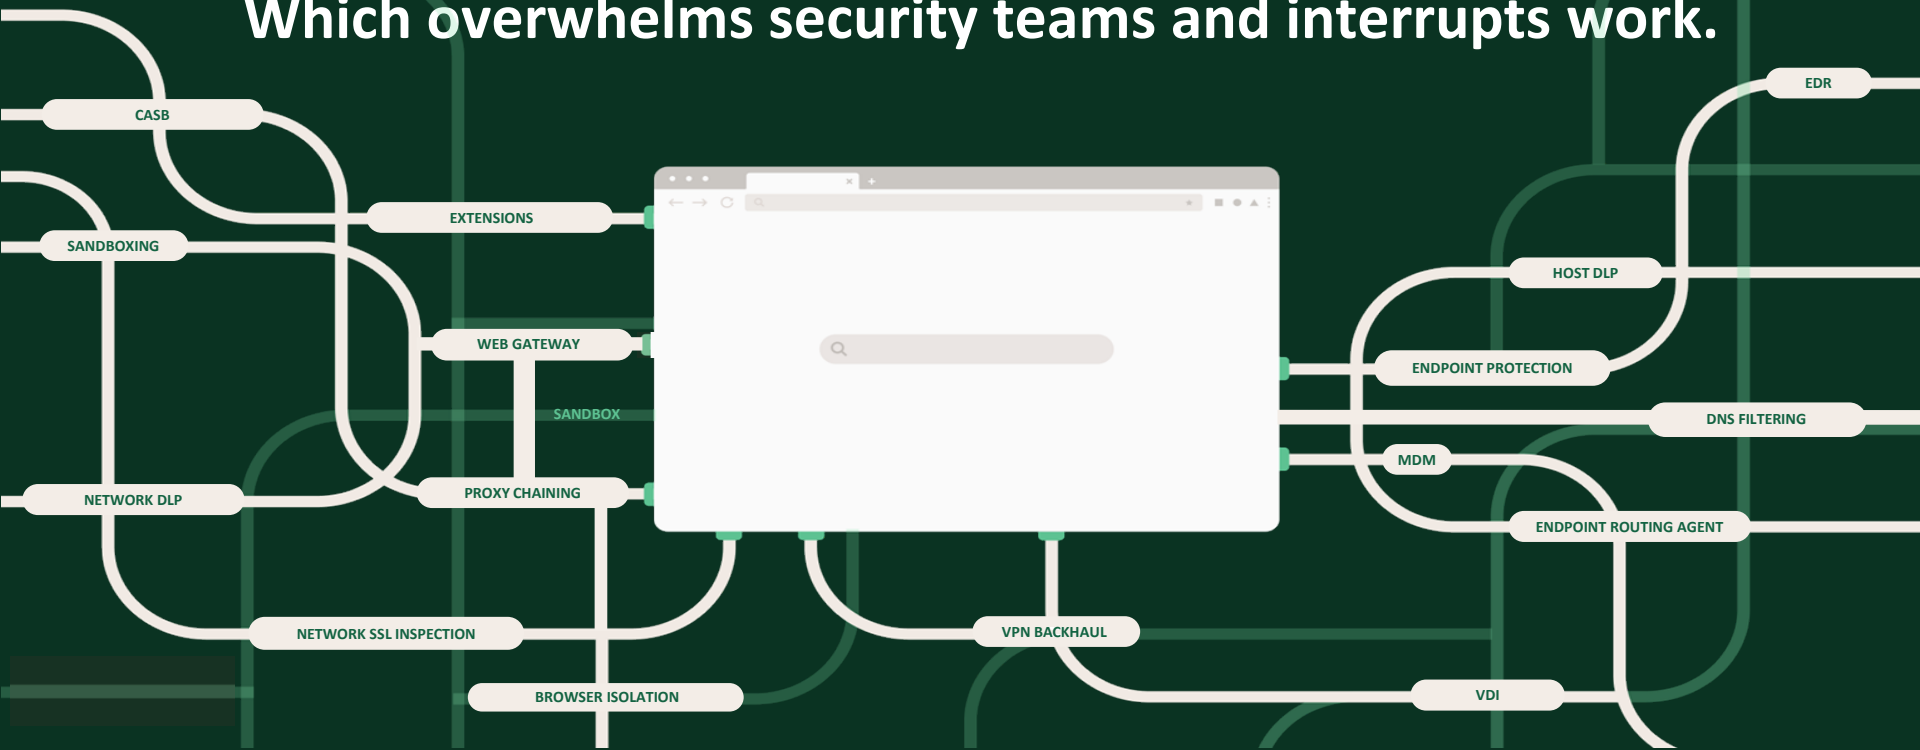

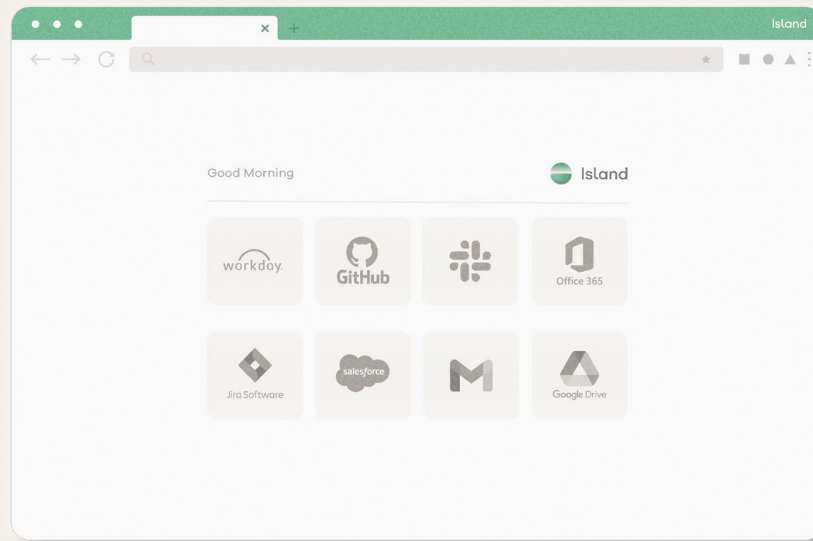

The application enterprises use most is The Browser.

Except the browser isn't an enterprise application

So we surrounded it with an **endless security stack**.
Which overwhelms security teams and interrupts work.

Enterprises have been ignored in the design of the modern browser.

Enterprise Browsers are here to change that.

Native and Simple User Experience Matters

Security Must Be An Embedded and Transparent

The Rise of the Chromium Browser

Chromium, an open-source project, has become the standard for the modern browser with core architecture

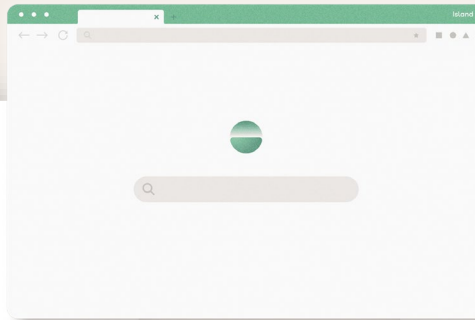

What If Your Browser Was Designed For The Enterprise?

The Last-Mile Control Enterprises Need The Experience End-Users Expect

Chromium Browser Features

- Networking
- Private Browsing
- User Experience (Look & Feel)
- Process Model & Isolation
- Core Codecs
- Extensions
- Device / Data Synch
- Page Rendering Engine
- Javascript Interpreter

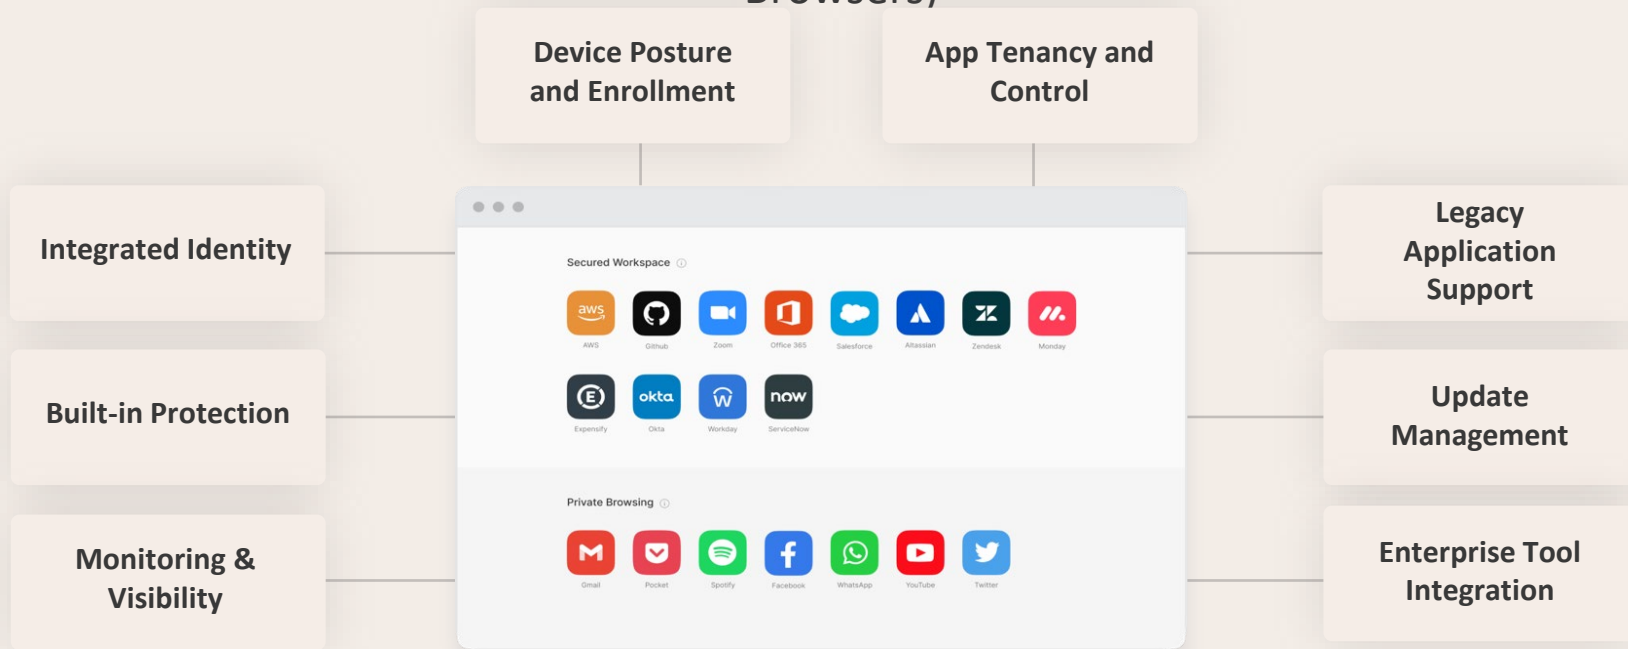

Enterprise Requirements

- Enterprise Trust
- Safe & Secure Browsing
- Browser-based RPA
- Enterprise Productivity
- Privacy
- Configuration Management
- Management
- Last-Mile Control
- Forensic Audit Logging
- User Experiences
- Traffic Management
- IT Supportability

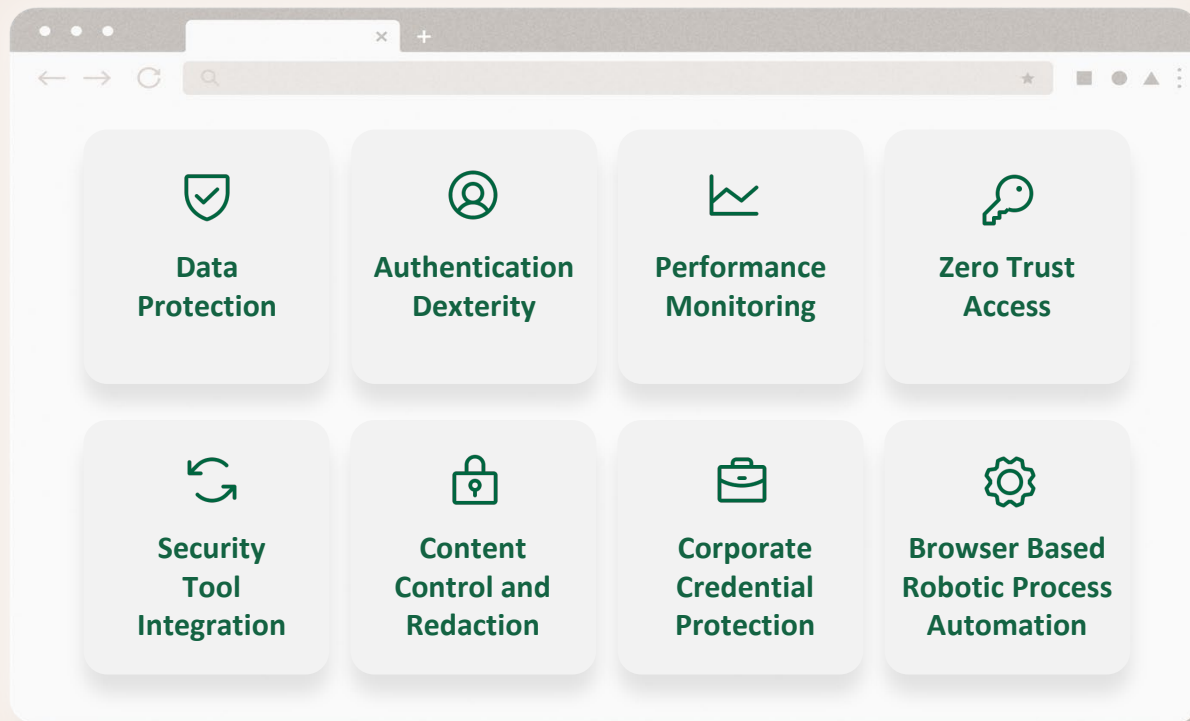

Delivering Out-Of-the-Box Value to the Enterprise

Value Delivered Before Enforcing Policy (Enterprise Browser vs. Consumer Browsers)

The Value of Last Mile Control

Controlling Origination & Presentation

Core Enterprise Browser Use-Cases

Critical SaaS
& Internal Web
Apps

Contractor
Security
& Third-Party

VDI
Reduction

BYOD Access

Say Yes

Additional Use Cases

- Govern **privileged users & critical transactions**
- Provide **native browser isolation**
- Safely **integrate M&As & joint ventures**
- Monitor & govern **call center workers**
- Protect against **ransomware attacks**
- Provision **disaster recovery browser**
- Gain insight into **resigning employees' behavior**
- Securely manage **divestiture of business units**
- Eliminate unnecessary **regulatory disclosures**
- Govern **developer access & usage of source code**
- Protect **pharmaceutical & chemical formulas**
- **Geo enforcement** for roaming users
- **Prevent unauthorized access** such as impossible travel
