- Work-life balance

Will McCloskey

Manager, Threat Management

About Me

Manager, Threat Management at Surescripts

13 years at Surescripts

20 years working in multiple facets of IT,
Joined Surescripts InfoSec team in 2021

How did I get into this career in the first place?

Started at a young age

- Broke my fair share of technology growing up
- Found my passions were all based around technology
- Let me passion drive my career
- After years of general IT, found myself always coming back to InfoSec

Making the transition to InfoSec

The first few months

- A whole new view of what I thought I knew
- Impostor syndrome round 2
- Overwhelmed with sense of scale and severity of the risks and threats
- Learning to trust my skills all over again
- Finding my balance

What's next?

Where do I see my work headed in the next year and beyond...

Finding my focus, What can we fix and how do we defend against everything else

Automation will be a key to success

Continued education and learning is key. The mouse traps won't get better on their own
